- AWS
- Linux
- HTML/CSS
- Docker
- Git
- Vue.js
- REST

EXPERIENCE

Lead Software Developer - Full-Stack / AllRead MLT

APRIL 2020 - PRESENT, BARCELONA, SPAIN

Working for a young start-up in Computer Vision and Machine Learning, it is my responsibility to design and develop the core API software architecture for both Cloud and on-premise solutions. In addition to building the front-end user interfaces, managing AWS/Kubernetes infrastructure, and writing and maintaining documentation.

Python Developer / CiiVSOFT

APRIL 2019 - FEBRUARY 2020, DARESBURY, ENGLAND

Working for a start-up in recruitment automation, it was my responsibility to contribute to, and design new features for our API platform capable of processing large amounts of data. In addition to managing our AWS infrastructure, integrating aspects of natural language processing, and integrating our API into different Application Tracking Systems API platforms.

Junior Cloud Engineer / CDL

JUNE 2018 - APRIL 2019, STOCKPORT, ENGLAND

Working for a large company in InsurTech, as part of a small agile team, it was my responsibility to work with different development teams and clients to understand, plan and develop their cloud infrastructure requirements. In addition to maintaining an infrastructure as code codebase, and meeting AWS best practices and company policies.

EDUCATION

&

CERTIFICATIONS

BSc (Hons) Forensic Computing / University of Central Lancashire
